Dear Mr. Dulles,

We have just published the autobiography of Count Coudenhove-Kalergi, the creator of the Pan-Europe movement. This significant political documentary work will no doubt cause much excitement, especially since it is making its appearance at a time when the question of European integration has gained decisive importance.

The title of the book is An Idea Conquers Europe. We are happy to mail it to you today at the author's request. We are convinced that this literature will provide you with some stimulating hours.

Respectfully,
